XCPT - Cryptopoint token

The Cryptocurrency with Agricultural Productive Land Underlying it

Why it is an innovative currency:

- **Alternative currency:** the value is linked to a tangible asset, the land
- **Value reserve:** attracts interest from institutional investors (ECB, Fed, etc.)
- **Exchange Currency Needed:** the purchase of land/multi-property by others will also require the use of XCPT currencies

**There is currently no other
cryptocurrency with these
characteristics!**

Synergy among the three components

XCPT - a cryptocurrency with underlying land

They will continue with broad economic and business autonomy, thus
unrelated to XCPT currency developments.
